

**TUBERCULOSIS (TB) SCREENING HISTORY**

Please complete the following screening tool:

Have you come to Canada in the past 5 years from one or more of the following regions?  Yes  No

- Asia (including Middle Eastern Countries)
- Africa
- Central and South America
- Eastern Europe

Have you spent more than 3 consecutive months in one or more of the following regions in the last 5 years?  Yes  No

- Asia (including Middle Eastern Countries)
- Africa
- Central and South America
- Eastern Europe

Do you have any of the medical conditions listed below?  Yes  No

- Kidney Problems
- HIV/AIDS
- Diabetes
- Silicosis
- Cancer

Do you take immune suppressing medications?  Yes  No

Have you been exposed to someone with tuberculosis in the past?  Yes  No

**If you answered YES to any of the above questions TB Skin Testing is required.  
Complete testing section below.**

If you are unsure how to answer any of the above questions, please contact your family physician or call Region of Waterloo Public Health at (519) 575-4400.

A **one step** (not two step) TB skin test is required for those child care providers and employees who have answered YES to any of the above TB screening questions.

The testing should be completed within six months prior to commencing employment and is strongly recommended for volunteers who expect to work more than 150 hours/year (one half day per week).

Note: Employees working at multiple sites or changing employment in the child care sector within Waterloo Region only require one TB skin test ever; therefore the 6 month requirement would apply only to the first job.

	Date of test	Result (in mm)
	____/____/____	
Chest X-ray If needed due to a positive skin test reaction as recommended by the health care practitioner at the time of testing. A repeat chest x-ray is not required within six months of hire.	____/____/____	

**TB skin test may be obtained through your family physician (will charge a fee as advised by the College of Physicians and Surgeons), a local walk-in clinic (fees vary) or can be arranged by calling Region of Waterloo Public Health at 519-575-4400 (fee will also be charged).**

<b>INFECTIOUS DISEASE HISTORY</b>			
Working with children may expose persons to a variety of infectious diseases. It is helpful for a person to know if he/she is immune to certain childhood diseases for his/her own protection (as some infections produce more severe symptoms in adults or are a concern to a fetus if a person is pregnant).	<b>Immune</b> (history of disease or immunity from vaccine)	<b>NO</b>	<b>UNKNOWN</b>
<b>Chickenpox</b> If you are unsure, a blood test can be done to determine immunity. A chickenpox vaccine is now available at your family physician, or contact Region of Waterloo Public Health for more information at 519-575-4400			
<b>Rubella (German Measles)</b> All women of childbearing age should know if they are immune to rubella prior to a pregnancy. A blood test will determine immunity; a routine test during pregnancy.			
<b>Please consult with your physician if you wish to determine your immunity to these infections.</b>			

<b>GENERAL HEALTH</b>	<b>YES</b>	<b>NO</b>
I am presently in good health.		
Any limitations to participation?
